

P.P.C. Buzet d.o.o.

P.P.C. Buzet d.o.o. is an integral part of business system CIMOS d.d. Koper. Founded in 1969, it exist under the name of CIMOS since 1972. Basic activity of the company is research, development and manufacture of car parts for first assembly of know car manufacturers.

Production program comprises the manufacture of engine parts and assemblies, elements from braking systems, body parts and gear parts. In the manufacturing process of the products, P.P.C. Buzet has the important role as global development supplier. Focus is in the field of total life cycle of products, from planning, development, industrialization and manufacturing processes.

With high investments in technology and equipment, P. P. C. Buzet has become a modern industrial complex with modern technology, modern manufacturing facilities and skilled employees that follow the development of industrial methods, organization and product quality assurance. Every day more than 150.000 different items are shipped from P. P. C. Buzet to most known manufacturers in car industry in France, Germany, Italy, England, USA, Romania, Austria and India.

The main technologies used in manufacturing centers of P. P. C. Buzet are:

- Aluminium pressure die casting (17 die casting machine between 420-1200 t),
- Aluminium gravity die casting (3 lines with 10 work places),
- Aluminium low-pressure casting, (1 line)
- Core manufacturing (5 machine – croning procedure),
- Surface sheltering (galvanization, cataphoresis),
- Machining (production module, CNC machining centre - horizontal, CNC machining centre - vertical, CNC lather machine... - total of 82 machine),
- Thermal treatment (in a protective atmosphere),
- Welding, Re-shaping, Assembling.

In the process is integrated the quality system for monitoring the quality of products, depending on the demands, further examined in our laboratories, where are installed modern equipment for monitoring processes:

- CMM machine,
- X-ray machine,
- Spektrografs,
- Conturograf
- Salt chamber,
- 3D digitizing system
- Penetrant inspection line

The company meets high quality level, environment and safety at work requirements. The company has acquired the following certificates:

- ISO/TS 16949-2009,
- ISO 14001,
- OHSAS 18001.

New expertise and knowledge and implementation of new methods represent a continuous investment. We have a well developed system of employees' selection and development of careers. Employees (their ideas, innovations, patents) are motivated through a remuneration (awarding) system. The roots of innovation approach are spread throughout designing, planning, technology and production processes with the single purpose – assure customers satisfaction

About 19% of employees have a higher education degree. The company is distinguished for its young management and flexibility of employees, who are ready to take up the challenges on the global market and are oriented to excellence.

Our vision says – become one of the creators and not only a participant of global processes
